National Finance Center Customer Notification

Date of Notification: February 17, 2011

Subject: FSDE Implementation into SecureALL

Database/Customer(s) Affected: All

Dear Customer:

The Financial Statement Data Exchange (FSDE) collects, reconciles, and consolidates footnotes and supplemental information to the financial statements. The FSDE application is being modified to use SecureALL (SALL) for user authentication.

SALL is a user administration and credentialing application developed by the National Finance Center (NFC) which enables Agency Security Officers to manage user passwords and view, report, and download user access information. All of NFC's Oracle-based Web applications are transitioning to SALL to perform their login functions. FSDE Implementation into SALL (Project # 00258) is scheduled for PP 04, 2011.

This notification is to advise users that upon implementing FSDE into SALL, a user that has access to both the Reporting Center and FSDE must use their Reporting Center password when accessing FSDE. Users that only have access to FSDE will continue to use their normal FSDE password.

Note: FSDE EAuth Login users will continue to use the EAuth login User ID and password.

Federal employees with questions concerning this notification should contact their Servicing Personnel Office. Authorized agency representatives with questions concerning this notification should contact NFC's Client Management Branch at **Customer.Support@nfc.usda.gov**.
